The Full DENTLISTUSA Range

Every dental instrument type, grouped by category. Items on these pages are available on inquiry - email dentlistusa@gmail.com with the instrument name and we will confirm price and availability. No price is listed for inquiry items.

Diagnostic & Examination

Mouth Mirror	Reflects light and gives an indirect view of teeth and soft tissue during examination.	**Available on inquiry**
Dental Explorer	Fine pointed tip used to detect cavities, calculus and surface defects.	**Available on inquiry**
Periodontal Probe	Calibrated probe used to measure pocket depth around teeth.	**Available on inquiry**
Cotton Pliers / Tweezers	Used to place and remove cotton rolls, pellets and small items in the mouth.	**Available on inquiry**
Cheek Retractor	Holds cheeks and lips away from the teeth for clear access and visibility.	**Available on inquiry**

Extraction

Extraction Forceps - Upper	Shaped for gripping and removing upper (maxillary) teeth.	**Available on inquiry**
Extraction Forceps - Lower	Shaped for gripping and removing lower (mandibular) teeth.	**Available on inquiry**
Extraction Forceps - Molar	Beaks contoured to grip molar crowns for extraction.	**Available on inquiry**
Extraction Forceps - Incisor	Narrow beaks for removing incisor teeth.	**Available on inquiry**
Extraction Forceps - Root	Fine beaks for removing retained roots and root fragments.	**Available on inquiry**
Extraction Forceps - Children's	Smaller patterns sized for paediatric extractions.	**Available on inquiry**
Elevator - Straight	Loosens a tooth in its socket before forceps delivery.	**Available on inquiry**
Elevator - Curved	Angled blade for access to posterior teeth and roots.	**Available on inquiry**
Elevator - Cryer	Triangular tip used to remove roots and root tips.	**Available on inquiry**
Elevator - Potts	Crossbar-handle elevator for controlled luxation force.	**Available on inquiry**
Elevator - Bernard	Elevator pattern used to luxate teeth and separate roots.	**Available on inquiry**
Luxators	Thin, sharp blades that cut the periodontal ligament to ease removal.	**Available on inquiry**
Root Tip Picks	Fine instruments for retrieving small retained root tips.	**Available on inquiry**

The Full DENTLISTUSA Range (continued)

Hemostats & Clamps

Kelly Hemostat	General clamping of vessels and tissue in oral surgery.	Available on inquiry
Crile Hemostat	Fully serrated jaws for secure clamping of vessels.	Available on inquiry
Mosquito Hemostat	Small, delicate clamp for fine vessels and tissue.	Available on inquiry
Rochester-Pean Hemostat	Heavy clamp for larger vessels and thicker tissue.	Available on inquiry
Rochester-Carmalt Hemostat	Large surgical clamp for pedicles and heavy tissue.	Available on inquiry
Halsted Hemostat	Small mosquito-pattern clamp for delicate work.	Available on inquiry
Spencer Wells Hemostat	Widely used artery forceps for general clamping.	Available on inquiry
Foerster Sponge Forceps	Ring forceps for holding sponges and dressings.	Available on inquiry

Needle Holders & Suturing

Olsen-Hegar Needle Holder	Combined needle holder and suture scissors in one instrument.	Available on inquiry
Mayo-Hegar Needle Holder	Sturdy holder for driving suture needles through tissue.	Available on inquiry
Crile-Wood Needle Holder	Finer jaws for smaller needles and delicate suturing.	Available on inquiry
Castroviejo Needle Holder	Spring-handle holder for precise, fine suturing.	Available on inquiry
Suture Scissors	Used to cut suture material and remove stitches.	Available on inquiry

Tissue Forceps & Tweezers

Adson Tissue Forceps 1x2	Toothed tip for gripping tissue with minimal trauma.	Available on inquiry
Adson-Brown Tissue Forceps	Fine serrated tips for delicate tissue handling.	Available on inquiry
Rat-Tooth Forceps	Interlocking teeth for a firm grip on firmer tissue.	Available on inquiry
Gerald Tissue Forceps	Long, fine forceps for delicate tissue work.	Available on inquiry
College Pliers	Dental tweezers for placing cotton and small materials.	Available on inquiry
Thumb Forceps	Spring forceps for holding tissue and dressings.	Available on inquiry

The Full DENTLISTUSA Range (continued)

Scissors

Iris Scissors	Small, sharp scissors for fine tissue and suture work.	**Available on inquiry**
Metzenbaum Scissors	Delicate scissors for cutting soft tissue.	**Available on inquiry**
Goldman-Fox Scissors	Curved scissors used in periodontal procedures.	**Available on inquiry**
Dean Scissors	Angled scissors for trimming tissue and sutures.	**Available on inquiry**
Ligature Scissors	Used to cut orthodontic ligature wire and ties.	**Available on inquiry**
Band Scissors	Used to cut and trim orthodontic bands and material.	**Available on inquiry**

Periodontal

Sickle Scalers	Pointed-tip scalers for removing supragingival calculus.	**Available on inquiry**
Jacquette Scaler	Triangular scaler for interproximal and posterior areas.	**Available on inquiry**
Gracey Curettes	Area-specific curettes for subgingival scaling and root planing.	**Available on inquiry**
Universal / Columbia Curettes	Curettes usable on all tooth surfaces for scaling.	**Available on inquiry**
Williams Probe	Periodontal probe with clear markings for pocket measurement.	**Available on inquiry**
UNC Probe	Long, thin probe marked in millimetres for periodontal charting.	**Available on inquiry**
Pocket Markers	Mark pocket depth on the gingiva before surgery.	**Available on inquiry**
Gingivectomy Knives	Knives used to remove diseased gum tissue.	**Available on inquiry**

The Full DENTLISTUSA Range (continued)

Endodontic

K-Files	Hand files used to clean and shape root canals.	Available on inquiry
H-Files (Hedstrom)	Files with a cutting flute design for canal preparation.	Available on inquiry
Reamers	Rotary hand instruments for enlarging root canals.	Available on inquiry
Spreaders	Tapered instruments for condensing gutta-percha laterally.	Available on inquiry
Pluggers	Flat-ended instruments for vertical condensation of filling material.	Available on inquiry
Broaches	Barbed instruments for removing pulp tissue from canals.	Available on inquiry
Gates-Glidden Drills	Engine-driven drills for widening the canal opening.	Available on inquiry
Endo Rulers	Measure file and point length during root canal treatment.	Available on inquiry

Orthodontic

Bracket Tweezers	Hold and place brackets during bonding.	Available on inquiry
Ligature Directors	Tuck ligature ties and archwire into place.	Available on inquiry
Band Pushers	Seat orthodontic bands firmly onto teeth.	Available on inquiry
Band Seaters	Apply seating pressure to position bands correctly.	Available on inquiry
Weingart Pliers	Utility pliers for handling archwires in the mouth.	Available on inquiry
Bird Beak Pliers	Form loops and bends in orthodontic wire.	Available on inquiry
Distal End Cutters	Cut the distal end of archwire flush in the mouth.	Available on inquiry
Pin Cutters	Cut ligature pins and fine orthodontic wire.	Available on inquiry
Archwire Cutters	Cut archwire to length during appliance fitting.	Available on inquiry

The Full DENTLISTUSA Range (continued)

Restorative

Amalgam Carrier	Carries and places amalgam into a prepared cavity.	Available on inquiry
Condensers / Pluggers	Pack restorative material firmly into the cavity.	Available on inquiry
Hollenback Carvers	Carve and shape amalgam restorations.	Available on inquiry
Discoid-Cleoid Carvers	Shape occlusal anatomy in restorations.	Available on inquiry
Composite Placement Instruments	Place and contour tooth-coloured composite material.	Available on inquiry
Matrix Bands & Retainers	Form a temporary wall for restoring the side of a tooth.	Available on inquiry
Wedges	Separate teeth slightly and adapt the matrix band.	Available on inquiry

Implant & Oral Surgery

Implant Kits	Complete instrument sets for implant placement procedures.	Available on inquiry
Sinus Lift Kits	Instruments for raising the sinus membrane before grafting.	Available on inquiry
Bone Rongeurs	Cut and trim bone during oral surgery.	Available on inquiry
Bone Files	Smooth sharp bone edges after surgery.	Available on inquiry
Bone Chisels	Shape and contour bone in surgical procedures.	Available on inquiry
Osteotomes	Expand and condense bone for implant sites.	Available on inquiry
Torque Wrenches	Apply controlled torque to implant components.	Available on inquiry
Implant Drivers	Place and tighten implant abutments and screws.	Available on inquiry
Molt Periosteal Elevator	Reflects gum tissue away from bone.	Available on inquiry
Freer Periosteal Elevator	Fine elevator for lifting periosteum.	Available on inquiry
Williger Periosteal Elevator	Raises tissue flaps in oral surgery.	Available on inquiry

The Full DENTLISTUSA Range (continued)

Hygiene & Prophylaxis

Scalers (Hygiene)	Hand instruments for removing plaque and calculus.	Available on inquiry
Ultrasonic Scaler Tips	Powered tips that vibrate calculus away from teeth.	Available on inquiry
